4 Easy Ways to Convert Fractions to Decimals wikiHow
To convert fractions to decimals, look at the fraction as a division problem. Take the top number, or the numerator, of the fraction and divide it by the bottom number, or the denominator. You can do this in your head, by using a calculator, or by doing long division. For example, ¼ is just 1 divided by 4, or 0.25. After you divide, you can check your work by multiplying the decimal by the denominator to get the numerator.
